Lethbridge Miners and Families Enjoyed Day Here

Big Party Came in Special Train and Day's Program Passed Off Very Successfully

1400 adults besides many children came on Friday to the annual picnic of Lethbridge miners. 19 passenger coaches, a baggage coach and cabooses, hauled by one of the heaviest type locomotives, arrived at 11 a.m.

Coleman band and citizens greeted the big train and the procession marched to the picnic ground, where cauldrons of tea and coffee had been prepared on open-air fires by the advance men, John H. Lowe and A. Semonsnik. An official welcome was extended by Mayor Burns and Councillor Snowdon. The program of sports was participated in by a large number, and the Caledonian Pipe Band of Lethbridge kept everyone in good spirits with their stirring music.

Coleman won the baseball game by 8-4, Milley pitching a good game for Coleman, and Falconer for Lethbridge. Coleman also won the football match, score 6-1, Jim Yates scoring three goals for Coleman.

Rain at 4 p.m. drove the crowd down town, but the time till train departure was happily spent in dancing in the arena rink, an orchestra from Lethbridge supplying peppy music. The pipers kept another crowd entertained in the K. of P. hall, and at the station Coleman band played for an hour before the train left. At 9 p.m. the big train pulled out with cheers from the large number of Coleman people at the depot, and the committee in charge expressed their appreciation of the spirit of co-operation extended on their visit.

Town Secures Revenue

Secretary Ford returned from Edmonton this morning. He states that \$4500 revenue from taxation on the power plant at Sentinel which the provincial government proposed to cut off will be retained by the town.

Crow Route is Favored

The tri-motored plane of Western Canada Airways passed over town shortly before noon on Saturday on its return from Vancouver. The altitude at which planes can fly over this route to the coast is much lower than by the northern route, and Manager Brintnell of the W. C. Airways favors this route for passengers and mails, choosing it for the return in preference to the northern route.

Department of Interior Forestry Branch

Notice is hereby given, in accordance with the provisions of Section 71 of the Regulations for Dominion Forest Reserves, that, by order of the Director of Forestry, the Crownest National Forest has been entirely closed to all camping and travel until further notice.

Dated, July 31st, 1929.

J. P. ALEXANDER,
Forest Supervisor.

MIN IN RIVER FIGHT DEATH FROM RAGING FOREST FIRE

COALSUR, Alta.—Eight men of the Forest Service had a remarkable escape from death in a huge forest fire, which raged along an eight mile front in the Brazeau reserve. A sudden shift of the wind cut off their retreat, and drove them into the waters of the Pembina river, with their horses, while the fire demon swept along its course over their heads.

For four hours, Ranger Hugh Cochran and seven men stood in the waters of the river, their heads and faces covered with cloths which they had to wet constantly, holding on to their fire-madened horses.

Tents, shovels and axes were lost by this unit of the fire-fighting force, in their mad scramble for life.

Lovett and adjacent mining centres were in grave danger, and a number of workers were dispatched to these centres to start backfires, and to remove families from the danger zone.

FIRE EXTINGUISHED ON SUNDAY

Carelessness by throwing away a lighted cigarette is presumed to have been the cause of a fire which luckily was discovered in the vicinity of the football field on Sunday, before it had time to spread into the tourist park. A party telephoned Chief Houghton, who immediately proceeded to the place with the chemical extinguisher and two men, and the fire was burning into the roots of some pine trees. Had the fire gained headway unobserved, it would have endangered the buildings on the hill and caused thousands of dollars worth of damage, besides rendering people homeless. This should serve to all to observe the greatest caution in throwing down matches, cigarette ends or anything which would start a fire.

BALL GAME AT NATAL

At 3:30 p.m. Sunday, Natal-Michel miners will play against a picked team from Cranbrook. This will draw a number from Coleman and Blairmore also the neighboring town of Natal.

Mr. and Mrs. J. Emmerson and children, Joy, Peggy and "Pat," left on Friday by car for Calgary, and from there they proceeded south to Yellowstone Park, and intend to return in about a week's time via Spokane and Cranbrook.

CONSERVATIVE LEADER TO SPEAK AT FERNIE

Hon. R. B. Bennett, opened the Conservative campaign in B. C., at a monster picnic at Spillarschen near Invermere. He will speak in Fernie on August 28th.

Born of United Empire stock, at Hopewell, N. B., fifty nine years ago, Hon. R. B. Bennett is the ninth generation of his race to be born on the North American continent. Educated in the public and high schools of his native province, he worked his way through Dalhousie University, and was admitted to the Bar at New Brunswick in 1903. For four years he practiced law at Chatham, N. B., and then moved to Calgary, where he took an active part in the building up of the western provinces. He was elected to the Alberta legislature in 1909 and to the House of Commons in 1911. Was appointed Minister of Justice and Attorney-General of Canada in 1921. Has twice represented Canada at Geneva for League of Nations and Red Cross Society.

By his own hard work and natural ability, he has carved out an independent fortune. At Winnipeg in 1927, he was elected leader of the Conservative party in Canada, and immediately severed all connection with his profession, resigned all his business directorships, and is now devoting all of his time and talents to the welfare of his party and the Dominion. A big business man, an eminent lawyer, an experienced parliamentarian, a man of means, he brings to his new task, exceptional qualifications.

Local News

Miss Peggy Fairfull returned on Monday from two weeks' holiday at Calgary, Edmonton and Sylvan Lake.

Mr. and Mrs. Frank Graham, Mrs. F. Graham Sr., Mrs. Arthur Graham and Mr. D. B. Fraser spent Sunday at Waterton Lake.

Miss Kitty Gray left on Monday for Edmonton after visiting with Mrs. Fraser, Sixth street, for several weeks.

Andrew Dow enjoyed a visit from his brother Gavin Dow, who is one of the pipers of the Lethbridge Pipe Band, which came on Friday with the excursion.

In the Toronto Conservatory of Music exams, three local pupils of Mrs. Salt passed, being Lorraine and Ralph Rippon, who passed with honors in the introductory pianoforte grade, and Prue Borden, passed in the elementary grade.

Mr. and Mrs. Fred Antrobus and Freda plan on leaving on Sunday for Vancouver, and will combine a business and pleasure trip. Buyers Week, sponsored by Vancouver Board of Trade, will bring together a large number of retailers, and visits will be made to the important manufacturing establishments. The store will be closed from Aug. 5 to 16.

If you have nothing to advertise in your business, you can at least advertise it for sale. Though nobody wants to buy a dead looking business, there is the chance that someone with more energy and vision will resuscitate it and pep it up with new life. The public will not go to a dead-head to do business. They are attracted to a live business house as moths are attracted to the light.

STAR CREEK RANCH HAS NEW ARRIVALS

Foxes born at Star Creek fox farm owned by Alex. Beck, a short distance west of Coleman, now bring the total to 115 valuable animals, and the proprietor states they had a very successful season. Accommodation is being doubled, the new pens necessitating the use of a carload of lumber. The investment, and caring for this large number of black foxes represents quite a business enterprise, which promises to assume quite an important place in the business life of the district. The ranch is ideally situated for the purpose, and a visit proves very interesting.

ANDERSON'S PIGEONS WON

SANDY WON A HAT

Three homing pigeons of J. Anderson and three of Charlie Makin's were released at Medicine Hat on Sunday morning. A distance by rail of 203 miles from Coleman. Actual time was not kept as it was not known the time they were released, but they arrived during the afternoon, when the temperature was over 90 degrees. Some pigeon fanciers had made bets they would not return from the "Hat." Sandy Dewar bet a new hat they would, so if you see him with a new lid you'll know the reason why.

INCREASED OUTPUT IN COAL

In view of the early slackening of coal production this summer in the Crows Nest Pass, the figures for May show a big increase over the same month of last year, being 229,228 tons as against 127,343 for May of 1928. A. A. Millar, chief mines inspector, states that so far this year coal production in Alberta is continuing to show gains each month compared with the corresponding period of last year.

The campaign of Canadian coal for Canadian consumers should be continued without any let up by mine owners, salesmen, and all others interested in the coal industry.

Summit Lodge A.F. & A.M. holds its regular monthly meeting this evening at 8 o'clock.

Mr. and Mrs. R. Laslett made the round trip to Calgary and return by car on Sunday, taking back with them their nieces who had been spending a month here.

James Ford, town clerk, and Councillor H. Snowdon, left on Sunday for Edmonton, in connection with town business.

Prompt Action Prevented Disastrous Forest Fire

Timber and Sheep at Crows Nest Mountain Were in Danger of Destruction

The efficiency of the forestry branch here was demonstrated on Tuesday in discovering and extinguishing a fire. The look-out man, J. Lardinois, at an altitude of 7,000 feet from his station a few miles south, telephoned to Forest Ranger Boulton in Coleman that smoke was rising on the west side at the base of Crows Nest Mountain.

Mr. Boulton and W. Antel, his assistant, immediately proceeded with the portable pump by auto to the scene, and discovered two log buildings ablaze with the roofs collapsed. It took over four hours to extinguish the blaze, which had originated apparently from beneath the building, and presumably from boys trying to smoke out a badger or other animal.

Had the fire got away, a herd of almost 2,000 sheep would have been in jeopardy, besides a valuable stand of timber. The speed with which the fire rangers dealt with the outbreak saved a great deal of damage. The forest reserve has since been closed for camping and travel till further notice.

Funeral of John Kapalka

On Thursday last John Kapalka, of West Coleman, was laid to rest in the Catholic cemetery, the service being held at Holy Ghost church by Rev. Fr. Lehman. Those attending were Mr. K. S. J., and R. G. K. T. J. Sokol, the pallbearers being members of the first lodge, of which deceased was a member.

Many beautiful wreaths were sent by friends and there was a large attendance of people from the Pass towns.

To day is the first of the eighth month of 1929.

Pictures amuse—they educate—they inspire. Our aim is to give you the best. We submit the following for the week:

WORLD HAPPENINGS
BRIEFLY TOLD

Reports from northern salmon waters in B.C. indicate a good sockeye catch this season.

The River Shannon has been harnessed in the service of the nation and has started distributing light, heat, and power throughout the Free States.

The Furness liner S.S. Nova Scotia, made a record trip from Liverpool when she docked at St. John's after five days and eleven hours on the Atlantic.

Government aid in the erection and operation of Canadian radio broadcasting stations for the benefit of Canadians has been recommended by the Kiwanis Committee of Public Affairs for K.C.

Charles Morse, C.C., registrar of the exchequer court of Canada, has been appointed an acting judge of that court for the purpose of dealing with appeals arising out of the revaluation of soldier lands.

On the arrival of the Canadian mails in London, recently, a portion of the Montreal mail was found to be rifled. It was reported that many of the registered packages of considerable value were missing.

The visible supply of American grain shows the following changes in bushels: Wheat, increased 5,968,000; corn, decreased 660,000; oats, decreased 158,000; rye, decreased 80,000; barley, increased 170,000.

Lieut.-Col. J. S. Rankin has been appointed junior solicitor in the department of national defence. It was announced by the civil service commission. Before moving to the capital recently Lieut.-Col. Rankin resided in Regina.

Daylight saving with clocks turned ahead two hours instead of one hour as in western countries, may be adopted in Japan, beginning with the summer of 1930. The proposal already has received tentative government approval.

Cleaning clothes with gasoline and smoking at the same time proved fatal for Fred Weston, who died of severe burns in hospital at Winnipeg. He received his injuries a week ago, when he dropped a cigarette into a gasoline container.

Advertising Alberta

Province To Exhibit Products and Resources At U.S. Fairs

Alberta will again be advertised this season by an exhibit of agricultural products and natural resources to be shown at a number of state and county fairs in the United States. Arrangements were made by the Publicity Branch of the Department of Agriculture to show this display at fairs in Minnesota, Iowa, Nebraska and Kansas during August and September. A marked increase in the interest shown in the opportunities for settlement in Alberta and in emigration to the province is reported from the localities in which similar exhibits have been shown during the past few years.

Cold Storage For Fruit

Word has been received that the Federal Department of Agriculture has made a grant of \$7,000 towards the enlargement of the cold storage facilities of the Vernon Fruit Union. This will enable the Union to store 70,000 boxes of apples at one time.

Our International Boundary

The International Boundary between Canada and the United States, including Alaska, is 5,560 miles in length.

Little Waldo was much impressed by his first trip through the garden. Coming to the morning glories, he shouted: "Oh, mother, come see the vine with the loud speakers!"

A scientist has discovered that housecleaning is caused by a microbe.

The Doorkeeper who had been a footballer. — Sondaginnise - Strix, Stockholm.

W. N. U. 1796

Tentative Schedule For
Western Air Mail

Service To Be inaugurated in October According to Present Plans

The new air mail service in Western Canada operating between Winnipeg and Regina, and between Regina and Edmonton, and between Regina and Banff, will be inaugurated early in October, if ground work can be completed in time it was announced by the post office department. A tentative schedule drawn up will send a plane roaring West from Winnipeg at 9 o'clock central standard time, every night to arrive at Banff at 6:45 a.m., Mountain time, early enough to have mail transferred to the train which left Winnipeg the previous morning.

Normally, postal matter mailed at Winnipeg during the 12 hours previous to the take-off of the plane would not reach Banff until the day after the machine's arrival. The new service by making use of a night flying route will be able to bring about a saving of 48 hours on matter mailed at Winnipeg and destined for the Pacific slope and 24 hours on transcontinental mail from points further east than Winnipeg which will be transferred from the train arriving at Winnipeg, and rushed ahead by air to overtake the train which left the day before. The east-bound mail will leave Banff at 11 p.m., Mountain time, and will arrive in Winnipeg at 9:15, central standard time the following morning catching the train which left Banff 24 hours before.

The schedule of the branch route between Regina and Edmonton has not yet been drawn up in any definite form.

Pioneer Missionary Honored

Memorial Citizen Pays Tribute To

In honor of the man whom the Indians called "The Noble Soul" and "The Man with the Good Heart," and who has come to be known in history as one of the greatest pioneers in Western Canada, 3,000 men and women gathered at the little town of St. Albert, nine miles out of Edmonton, on the Canadian National Railway.

"For sixty-seven years he labored for God, his fellow men and his country," says the inscription on the base of the monument to Father Lacombe, and citizens prominent in the affairs of the northwest and of Canada itself paid tribute to him as a man, a teacher and a builder.

Born in Quebec in 1827, Father Lacombe came west in 1849 and built his mission at St. Albert nearly 60 years ago. Today, high on the hill, and within a step of the old log church which afterwards became the cathedral, stands the life size figure in bronze of the great missionary. With cross uplifted as in the days of his heroism among the Indians, Father Lacombe stands and looks down over the valley. The statue was brought from France by means of the efforts of Rev. Father Jan, O.M.I., parish priest of St. Albert, assisted by prominent citizens and donors of the monument. A group of patrons of which one of the most interested was Sir Henry Thornton.

The statue was unveiled by Patrick Burns, of Calgary, old friend of Father Lacombe, and addresses were delivered by Hon. Charles Stewart, Minister of the Interior, Ligonry Lacombe, M.P., relative of the honored missionary and representative of Quebec.

No contribution ever made by his department gave him more satisfaction than the memorial park which had been set aside at St. Albert and in which the monument stood. Hon. Charles Stewart said in his address. The Alberta government gave its assistance and the Canadian National Railways donated and brought in the gravel for the highway leading to it. In commenting on the creeds and races, and stations, represented in this gathering in honor of a great citizen, Mr. Stewart declared that the complex problems of race and creed in Canada would be settled by the broad tolerant united spirit which characterized today's ceremony.

Quebec, said Ligonry Lacombe, was proud to have given birth to the son who became the hero of the noble pages of the northwest. Father Lacombe was a colonizer who saw the future of the prairies with confidence. And his sowing, scattered in the soil of sacrifice, was bearing rich fruit.

Bisley Veteran Dead

R. T. Calger Had Not Missed Meet Since 1860

R. T. Calger, outstanding veteran of the National Rifle Association's meeting at Bisley Camp, is dead, at the age of 80 years. He was known and beloved by marksmen from Great Britain and all parts of the empire.

Calger saw Queen Victoria fire the opening shot in the first N.R.A. meeting held in 1860. He competed himself for the Queen's Prize that year and many years since, and until last meeting recently concluded, had never missed a single meeting. Right up to the last Calger could sing a song with the best of the visiting marksmen.

Chief—You want time off to be married? You only returned from holidays yesterday. Why didn't you get married then?

"I didn't know the lady then."

A total of 576 films was shown in Finland in 1928. Of this number the United States supplied 364.

IMPERIAL ECONOMIC
CONFERENCE

Right Hon. Philip Snowden, chancellor of the exchequer, announced in the House of Commons that communications were going forward to the dominions looking to the summing up of an Imperial Economic Conference. Its purpose, he said, would be consideration of ways and means of extending intra-empire trade.

Radio and Good Music

Broadcasting Of High Class Orchestras Giving Place To Jazz

Radio started upon its spectacular career as something of a toy. It was a contrivance which the mechanically minded could fool with in their spare time and which they could use to amuse the uninitiated by the marvellous results of their ingenuity. Soon it took on more formidable proportions and before most of us realized its possibilities it was not only providing universal entertainment but proving itself an important factor in our cultural progress. In this upward curve in radio development to be continued? Or, having reached such heights, is the curve to turn downward?

This question is implied by the fact that radio music is sinking into a decline. There are more jazz and less concert music on the air than there were a year or two ago. The broadcasting of the recognized orchestras is being cut down in favor of popular song and dance numbers.

If this tendency continues the radio will be losing an unprecedented opportunity. One of its greatest assets is its ability to bring good music into the homes of people who have never had the opportunity to appreciate what music can be. It has done much to develop a taste for the classical as opposed to modern jazz and could do much more. It has a certain responsibility it cannot escape.—New York Evening Post.

Information Wanted

"Suppose, Besse," (the teacher was trying to explain the meaning of recuperate), "suppose your papa has worked very hard all day? He is tired and worn out, isn't he?"

"Yes, teacher."

"Then when night comes and his work is over for the day, what does he do?"

"That's just what mother wants to know," replied Besse.

"Don't trim your lamp so zealously as to extinguish it."

Any man who hasn't a good opinion of himself is inwardly deformed.

SUNDAY SCHOOL LESSON

AUGUST 4

BELSHAZZAR'S FEAST

Golden Text: "Be not drunken with wine, wherein is riot."—Ephesians 5. 18.

Lesson: Daniel 5:1-31.

Devotional Reading: Psalm 1.

Explanations and Comments

Belshazzar's Feast, verses 1-4.—Belshazzar invited a thousand of his lords to a great feast, at which they drank wine from the gold and silver vessels which his father Nebuchadnezzar had taken from the temple in Jerusalem. And as they drank they praised the gods of gold and of silver, of brass, of iron, of wood, and of stone.

Quick the king spoke, while his proud glance burned.

Quickly the servant went and returned.

He bore on his head the vessels of gold.

Of Jehovah's temple the plunder bore.

With daring hand, in his frenzied grip, The king seized a beaker and filled to the brim.

And drained to the dregs the sacred cup, And foaming he cried, as he drank it up.

"Jehovah, eternal scorn, I own To Thee, I am monarch of Babylon."

Thus the German poet Heine pictures the scene. Even to a pagan mind such a use of sacred vessels was sacrilege. It was a bold defiance of the Most High God.

The Writing On the Palace Wall Which the Wise Men Fail To Interpret, verses 5-8.—While they were thus reveling, they saw the fingers of a man's hand write upon the wall. Belshazzar trembled and called for the enchanters and soothsayers to interpret the writing, but they could neither read nor interpret it.

On the Queen's advice, Daniel is brought before the king, verses 13-16.—The queen entered the banquet hall to calm the king by telling him that there was a man in his kingdom whom Nebuchadnezzar her father had made master of all the wise men, and he could interpret the dream. So Daniel was sent for. The king told Daniel that he had heard of him, and his wisdom, and if he would read and interpret the writing, he should be clothed with purple (the royal attire), have a chain of gold about his neck and be clothed third ruler in the kingdom.

The Interpretation Of The Writing, verses 25-28.—This is the writing "Eled, Upharsin." That is, "Numbers" that was inscribed: "Mene, Mene, ed, Numbered, Weighed, and Divisions," as the words given literally in the margin of our Bible.

"We too, shall be weighed in the balances and found wanting? If we put our lives into God's hands now, we need have no fear of passing into His hands, then. We have our temptations, but they are not greater than those of Belshazzar. We have our pleasures and our opportunities and they are not even greater than his because of the age in which we live. But this is certain: we have what Belshazzar had not—the example and teaching of Jesus Christ and the grace that never fails those who avail themselves of help divine."—J. V. G. Ward.

Taking Long Hike

Newfoundland Man Making World Trip For \$40,000 Wage

Andre R. McWhitty, a Newfoundland Scout, who two years ago set to do a round-the-world tramp for a wage of \$40,000, has just completed his tour of England and Scotland. Mr. McWhitty, who is 43 years of age, is the son of a Scotsman who emigrated to Newfoundland. Mr. McWhitty hopes to complete his tramp in North America within the next six years. He is carrying equipment weighing 38 pounds, and endeavors to obtain the autograph of the Chief Magistrate or Mayor of every town he passes through. The signature of the Lord Provost of Glasgow is among those in his log-book.

Peace River Crop

Wheat production in the Peace River District may reach 10,000,000 bushels this year, barring frost and hail, according to L. A. Giroux, M.L.A., who is back from that region. He expressed his belief that the crop of wheat will be the best in twelve years.

New Wonders
Of the Air

Amazing Development Shown In Planes Now Under Construction

With aeroplanes that travel at a speed of over three hundred and fifty miles an hour and giant air ships that cruise restaurants and ballrooms, few of us dare probe into the future of aviation. Every day sees some great new wonder of the air, and here are a few that we may expect in the course of the next few months.

A colossal flying hotel, with even more room and comfort than the Graf Zeppelin, is being built in Germany. With accommodation for eighty passengers, the aeroplane will weigh fifty tons and will be four times larger than any machine yet constructed.

Work has been already commenced on a huge air liner which is to carry fifty passengers. Some idea of the size of the new machine is obtained when it is learned that the passengers will travel in the wings, which are to be eight feet thick.

A seaplane measuring one hundred feet from wing-tip to wing-tip has already passed its flying trials in America. With accommodation for thirty-two passengers, it has been built to compete against the huge new European flying boat.

Interesting Exhibit By
Experimental Farms

Several New Features Seen On Western Fair Circuit

Several new features were seen in the exhibit from the Dominion Experimental Farm on the Western Fair circuit.

The animal husbandry section consists of a central device which points out the relation between high milk production per cow, and low milk production per 100 lb. on the other. This relation is accentuated by photographing of dairy cows with legends calling attention to the fact that the high producing and low producing cows can only be determined by the use of the milk scales and Babcock test. On the tables are shown types of suitable milk scales and also a Babcock test outfit, with instructions for use, milk recording sheets and case, etc.—In fact, everything necessary to conduct the testing of a herd of cows for milk and fat production.

The botanical section of the exhibit illustrates, by means of rusted plant material and otherwise, the life cycle of the stem rust organism. It shows the types of injury caused to the living plant, and the effects of the rust on the grain. Another phase of the exhibit is a demonstration of the methods used in controlling stem rust. This shows the effectiveness of sulphur dusting as a measure for the prevention of rust, and likewise the results which are being achieved by the plant breeders in developing rust resistant varieties of wheat and oats.

The Need Of The Hour

Appears To Be Better Driver Than Better Cars

Good automobile driving is essentially a matter of good manners. They are one and inseparable, suggesting that "distinction without a difference."

If more good manners among motorists would make good drivers, and that would be inevitable, users of the highway and streets would desire nothing more than a great rebirth of chivalry and strict adherence to the rules of etiquette.

It is not the need of the hour better drivers rather than better motor cars?—Montreal Herald.

Medium Would Be Right

The young housewife called at the shop to buy oysters.

"Do you want large or small ones?" she was asked.

"Just medium, I think," she said.

"My husband takes a 16 collar."

The average elevation of the earth

above the sea level is 2,300 feet.

"Why did you cut the throat of the prima donna?"

"I was told she had a fortune in her throat."—Moustique, Charierol.

Finest Limited Train on Continent

This is how the Trans-Canada appears as she leaves Montreal each evening. The all-steel equipment of this train, which was built at the Angus Shops of the Canadian Pacific Railway is epitomized in the Solarium car which is carried at the rear end. With a vita-glassed sunroom, two shower baths, men's and ladies smoking-room and a large observation-lounge, this car is the most luxurious to operate over Canadian lines and is open in its entirety to patrons of the Trans-Canada Limited.

The Singing Fool

By HUBERT DAIL
Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS
Marcus, the famous Broadway producer, takes a party of four to Blackie Joe's New York night club. Al Stone, Blackie's chief comedian and singing waiter, is desperately in love with Molly, the ballet singer, and begs her to read a song he has written for her. After scornfully refusing and telling him she will never marry a waiter she goes to the Marcus table and tries to ingratiate herself with the great producer. Blackie seeing Al dejected, urges him to sing the song himself — to Molly. Al says he can't sing a ballad, but finally he consents. Grace, the cigarette girl, who is deeply and unselfishly in love with Al, encourages him.

CHAPTER VI.

The room was filled with careless chatter as Al took his place beside the pianist, at the edge of the dance floor, to sing the heart song he had written to Molly. No one in the gay crowd seemed to notice him; no one except himself. Blackie Joe and Grace knew that the next few moments meant to him success or failure with the girl he loved. He was plainly nervous at trying a ballad; his face went white and one hand gripped the side of the piano.

The pianist struck the opening bars and Al began the verse, haltingly but determinedly. He had located the one face he wanted to keep before his eyes throughout the song—Molly's. But Molly was busy talking to Marcus; she didn't even know Al was singing.

As he continued the people at the tables nearest him stopped talking and gave him their attention. Then it seemed as if he caught the merry-makers a little farther away and now, too, became silent. He was singing as he had never sung before, throwing his whole soul into the words.

When he finished the verse and swung into the chorus the pianist whispered up to him, "Good boy, Al!" And as the pianist ran his fingers swiftly up and down the ivories he marvelled at this singing waiter.

Had Diarrhoea Bowels So Active Feared For His Life

Mrs. S. J. Jago, Canobie, N.B., writes: "My little boy, when three years old, had severe attacks of diarrhoea. The bowels were so active, and he vomited so much, I feared for his life. I tried many medicines, but he was always getting worse. A friend told me of

and after the second dose I saw an improvement. I gave him almost half a bottle and he was completely relieved.

"I have used it for the other children, and my husband and myself. My husband gives it the great praise."

and when he goes away from home to work he always takes a bottle with him.

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

W. N. U. 1798

who had been a comedian up until this moment and now suddenly unleashed a voice vibrating with sentimental appeal.

Al relaxed when he reached the chorus. It was the chorus that would put him over, several times as a failure to Molly, but he felt it so deeply that he seemed to sing it without effort. Every person in the audience was blocked out from his vision except Molly — her vivacious face stood out alone in a sea of darkness. Yet he could not help but see that she was still talking to Marcus. She, among all the listeners in that big room, seemed to be heedless of his presence.

But as she whispered to Marcus a strange thing happened. The astute revue producer heard the song and, although he hadn't paid much attention to it at first, now he suddenly became all interest. His hand came in a quick gesture, and he leaned forward. He whispered curtly:

"Sh-h! I want to hear this."

It was the first time that evening he had flattered the floor boy by the least bit of attention, so Molly was astonished. She followed the manager, fixed on Al, and she, too, began to listen. At first she averted a glance of amusement Al's way—what did that comic waiter mean by trying a ballad? Then, after a moment, Molly also realized that Al was putting some new quality into the song. It was as if he had discarded the ordinary technique of ballad singing, and was creating his own method, the supremely natural method, as he went along. At times his voice dropped to a low, pleading croon, and again he talked the words with all the fire at his command; and now his voice suddenly rose to a stinging and passionate crescendo of appeal. Molly was not stupid; she realized that the singing waiter she had scorned so recently was really creating a living song. Like the call of fate his full, resonant voice repeated the title—"Always"—which occurred so frequently in the ballad.

She looked at Marcus; he was leaning forward, giving Al his rapt attention.

As Al felt Molly's eyes on him the footlights of his soul opened and, to all intents and purposes, he was alone with her, adoring her, telling her of his love that would last always. He thought the song was going home—it seemed to him her eyes grew gentle.

But the person most deeply affected was Grace, the cigarette girl. She stood, quietly leaning against the wall at the back of the room and, in the semi-darkness, no one saw the tears come to her eyes and trickle, unheeded, down her pretty cheeks. Oh, what wouldn't she have given to have Al sing that song in that way to her! Everything she possessed, her life itself!

Now for the first time she realized with what passionate devotion she loved him. Her lovely young bosom rose and fell rapidly and in her heart was a pleading, stinging ache that seemed to grow more intense with every word Al uttered. Dear little Grace, so loyal and so lovely, yet forced to stand aside unnoticed and see another woman, who didn't appreciate Al Stone, receive the homage that he tossed so eloquently at her feet. It was maddening to Grace—but there was nothing to be done about it except go on loving him and endure the pain in her heart.

Now she saw Blackie Joe approaching. She furiously tried to dry her tears. Blackie saw and understood her feeling at first glance but, like the good, understanding fellow he was, pretended not to notice. "Poor kid," he thought. "Well . . . that's the way it goes." Then he turned to Grace and whispered confidentially:

"Our comic's not so bad after all, is he?"

Grace looked up and forced herself to smile happily.

"It's wonderful!"

Finally the last notes of the music died away—the song was ended. Al stood for a moment as if in a trance, then quickly turned and walked toward the dressing rooms. The room was as silent as a desert night, not a crackle of applause broke the stillness. Al's chin came down on his chest; he felt he had failed and he wanted to get out of the room as quickly as possible.

At the Marcus table Molly's eyes were fixed on his retreating figure. She was adversely affected, a rain that she didn't understand had risen in her heart. At any rate, she knew what Al meant now.

The reaction of Marcus to the song was decidedly different. He saw it as a piece of work, a medium for thrilling audiences. Turning to Molly he almost shouted: "That's—a song! One of the best ballads I've heard!"

In a flash, Molly realized that Al had a real hit, a heart-throb number that might put him over on

Broadway and make him famous. Her eyes became intensely brilliant, she was thinking fast.

As Al approached the dressing room doorway he encountered Grace and Blackie. Swiftly he spoke:

"You see, it's no use—I knew I couldn't put over a ballad. For a moment it seemed I had Molly interested, but I couldn't hold her. And not a peep from the crowd—"

But Al stopped, dashed. From the crowd came the slow rise of applause. They had been too closely held by the song to give vent to their emotions as he walked rapidly away, but now their feelings were released in a storm of appreciation. He had reached every one of them and their strenuous hand-clapping rode toward him like a great wave. They had never given him such a reception before.

As he swung about, facing them, his dejected look passed, and a smile crossed his features. Then he saw Molly's face turned toward him, while Marcus rose, leading the thunderous applause.

At Marcus's table Molly heard the celebrated producer say:

"That waiter's a singing fool—he's great! And who wrote that song? I want it for my revue."

Not for a moment did Molly doubt now. Al's future was assured, with the great Marcus determined to have his song. She began to lay her plans swiftly.

"The waiter wrote it," she answered. "The boy who just sang."

"The waiter wrote it?" repeated Marcus, amazed.

"Yes, but he's a pleading croon," Molly smiled coolly. "I gave him the idea."

(To Be Continued.)

May Solve Problem

Floating Flying Ship Might Make Ocean Trip Safe

Never has Louis Bleriot lost his faith in the air. Never for a moment has he doubted the ultimate value to the world of the high-speed passenger plane.

Bleriot, whom the whole world will soon honor, has a keen brain which is ever busy with aerial problems. At the moment that active mind of his is concerned chiefly with the question of Atlantic aerial transport.

It is not the spectacular aspects of ocean flying that interest him. He wants to cover a great aerial ocean by instituting a regular commercial trans-Atlantic air service. To this end, in the big air works he controls, he is busy with the details of a very wonderful machine. Part ship it is, and also part flying machine.

The big graceful hull resembles rather of a giant motorboat.

The hull-structure actually is a self-contained marine craft intended to move on the surface of the water like a ship, being driven by a main engine and an underwater screw. But this ultra-modern ship does something more than sail the sea. It also rushes high through the air.

Provision is made for dropping in to position above its hull a complete system of wings, aero-engines, and propellers, and when thus equipped it becomes a powerful long-range flying machine. In any emergency, should the craft have to descend somewhere out at sea, the crew would be able to abandon their flying gear, and steer like a surface craft for the nearest liner or shore station. That the solution of ocean flying may lie in the use of giant "hybrids" of some type such as this is now Bleriot's conviction, and the trials of his first "flying ship" are eagerly awaited.

Not An Old Custom

We are having all sorts of anniversaries these days. The latest is the three hundred and fiftieth anniversary of the adoption of the fork as a table utensil. That event surely is worthy of some celebration. After all some of our accepted customs do not go very far back into history.

Indigo Plant For Tokyo

What is believed to be one of the largest artificial indigo plants in the world is to be erected near Tokyo, Japan. It will cost more than \$15,000, and will take three years to build. It will produce 1,000 tons of the product a year.

Japan has two millionaires whose holdings are estimated at \$250,000,000 each.

Banting Research Foundation

Western Doctors, Having Received Awards, Will Work On Interesting Problems

In recognition of their contribution to the progress of science two Winnipeg doctors have been made the recipients of awards under the Banting Research Foundation, according to announcement made by board of trustees.

Under the grants Dr. B. Chowin will carry out important experiments in connection with his studies into the causes of kidney diseases in young children, while Dr. J. Jackson will engage in research study of the thyroid gland.

A study of gas anaesthetic will be conducted with the grants by Dr. W. E. Brown, Jr., demonstrator in anaesthesia at the University of Toronto, and Dr. Allan Kennedy, who graduated from Varisty two years ago and has since been at the Toronto General Hospital.

Dr. W. D. M. Lloyd, who holds an M.S.C. degree from Western University, Dr. Banting's alma mater, will work at Toronto on a study of the changes produced by certain diseases in the heart muscle and in its innervation.

An endeavor to locate the brain cells concerned in controlling blood pressure will be made by Paul E. Mueggler of Saskatoon. Dr. F. F. Mueggler will study the solubility of uric acid, and Miss E. G. Frame will work on the comparative anatomy of the spleen.

The interesting problem of the changes in the brain in old age will be studied by C. G. Smith, in London, Ont.

The foundation is supported by public spirited citizens throughout the Dominion as a mark of honor to Dr. F. G. Banting, the discoverer of insulin. Grants are made to foster and assist medical research.

Making Flying Safer

Weather Reports Received By Pilots Give Location Of Storms

The following paragraph, lifted from the story of a reporter who recently travelled from Los Angeles to New York by the air-rail hook-up of Transcontinental Air Transport and the Santa Fe and Pennsylvania railroads, tells as well as anything can the way in which airways are being made safe for passengers.

"Weather reports," writes the reporter, "told us there were storms between Santa Fe and Pennsylvania. We took off, anyway, but our two pilots talked with ground stations ahead and behind us by radio and knew just where all the storms were. So we simply flew around them. I don't know whether our report told of three storms converging to the eastward, so we had to detour again, but we sped around them quickly in the midst of lightning and rain, and reached Clovis, N.M., before dark, which the pilot had not expected to do."

In a few words that paragraph tells how flying has passed the hit-or-miss stage and has made safety certain.

Figures Show Women

Are Careful Drivers

Record Of Columbia Traffic Bureau Prove Bulk Of Offenders Are Men

The old fashioned cartoonist who still shares the general masculine belief in the inability of women to drive automobiles was given a severe test in figures made public by the District of Columbia Traffic Bureau. The bureau has been conducting an intensive campaign to cut down traffic accidents. Of 859 persons arrested for various violations of the traffic rules since July 1, only twenty-eight were women.

That's less than 3.2 per cent. of the total and indicates, according to ardent feminist calculators, that women are about thirty times as good as men when it comes to driving automobiles. The standpoint for the old doctrine, on the other hand, argue that it merely goes to show, that most traffic policemen are of an excessively susceptible nature.

Asthma Can Be Cured. Its suffering is as needless as it is terrible. Endure. After its many years of relief of the most stubborn cases no sufferer can doubt the perfect effectiveness of Dr. J. D. Kellogg's Asthma Remedy. Comfort of body and peace of mind rest with its use and nights of sound sleep come back for good. Ask your druggist; he can supply you.

When ever a man comes to this conclusion that he is indispensable, says a wag, then he isn't.

The name for the state of California comes from a Spanish word meaning "hot furnace."

Minard's Liniment for aching joints.

Adopting Western Ideas

Chinese Youth Have Good Times But Still Respect Parents

Although they may not say "Whoopee" in China, the modern Chinese youth makes it, and they call it "whoopee." The younger generation in South China, are reaching for and adopting Western ideas," said G. P. Hamsworth, general agent of the Canadian National at Hong Kong, who passed through Winnipeg on his way to Hong Kong after spending a holiday in Europe and England.

"At the better entertainment places," continued Mr. Hamsworth, "you see the modern Chinese flapper with short skirts, bobbed hair and silk stockings, while the boys wear double-breasted suits and wide pants. They dance fox trots to our music, and have adopted English foods and eat it the way we eat it. The young people are also very fond of movies and Hong Kong and Shanghai have excellent theatres."

In spite of this change to Western ideas, it is very noticeable that the respect and admiration which the Chinese youth holds for his parents and older people is not disappearing.

SAVE THE CHILDREN

In Summer When Childhood Ailments Are Most Dangerous

Mothers who keep a box of Baby's Own Tablets in the house may feel that the lives of their little ones are reasonably safe during the hot weather. Stomach troubles, cholera infantum and diarrhoea carry off thousands of little ones every summer, in most cases because the mother does not have a safe medicine at hand to give promptly.

Baby's Own Tablets relieve these troubles, or if given occasionally to the well child they will prevent their coming on. The Tablets are guaranteed to be absolutely harmless even to the newborn babe. They are especially good in summer because they regulate the bowels and keep the stomach sweet and clean. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Boy Scout Shoots Kodiak Bears

Will Write a Book Covering Trip Across Canada

Across Canada
Dick Douglas, world famous Boy Scout, who crossed Canada recently by Canadian National Railways, in the short space of a month, shot two hundred Kodiak bears in the island of Alaska. "Incredible as it may seem," Dick Douglas writes on my trip "I shot two hundred and ninety eight with a camera, and two with a gun. One only measured 9½ feet. I was told he was a small one, but he looked big enough to me when I saw him first about 50 yards away." Douglas, who accompanied Martin Johnson during his last African trip, will write a book covering his trip across Canada, and to the Kodiak Islands. En route to Montreal, Douglas stopped at Jasper National Park to photograph some animals and scenery to reproduce in his new volume.

The world uses eight matches per day per inhabitant.

NOTES AND COMMENTS

Vacations are beneficial. They furnish a change from every-day routine, even if some do come back more tired than when they started out so blithe and gay. If you haven't the cash to travel, then you can ease up on the daily grind and make believe you are having a holiday right at home. You will not have the anxiety of trying to make the money stretch to make a thousand-mile journey on a hundred-mile appropriation. And the chances are you'll be easier in mind when the chilly winds blow and the necessity arises to lay in a few tons of coal and buy winter clothing for the kiddies.

Distant fields invariably appear green. The beauties of some other place attract us more than those we see every day. Familiarity breeds contempt. People coming from other places admire the beauties which we ignore. Many go on a holiday trip and wonder why we cannot fix up places as nice as those we visit, overlooking the fact that those places started on exactly the same basis as the beauty spots that are within our own backwash. It was initiative and enterprise and vision, which with the expenditure of money and energy judiciously applied, enhanced the natural attractions. It is our own shortsightedness which prevents us from appreciating and enhancing the assets we possess. It is the same the world over.

Earlier in the year we harped rather persistently on the need of paint being applied more liberally on town buildings. It bore fruit, thus demonstrating the results of a little propaganda, and a number of buildings look worth more than double than when they displayed a dirty, uncareful appearance. Incidentally it furnished business for sellers of paint and work for painters. And there is still need for hundreds of gallons of paint.

It is the same with clothes. A man becomes accustomed to seeing himself in the same old duds that he fails to realize they are looking seedy. He overlooks the fact that appearance counts and that clothes do help to make one feel more respect for himself, which naturally increases the respect of others. The savage aims at some kind of a dress, scanty though it may be. Modern man desires more adequate covering. And the better appearance he puts up the better chance he has of impressing others with a sense of his valuation. Appearances certainly do count and have far-reaching effect.

The vacant lots on which are dumped tin cans and refuse are an example of appearances. It is time the council put into effect a bylaw providing for the collection and disposal of garbage. This indiscriminate scattering of household rubbish needs vigorous action to eliminate the nuisance, for some people are so lacking in pride that they dump ashes almost on the front doorstep.

Business men with stores on Main street have a righteous grievance. Every morning there comes along a grader stirring up the gravel and dust, causing them to wonder why they should be so annoyed. In plain language it looks like damned tomfoolery, this tinkering with the road every morning. If there is a reason for it, then we would like to be told. What is the use of oiling the road if it is to be stirred up every morning? And what is the works committee of the council going to do about it? Surely they have jurisdiction within the town limits.

The man who says, "What's the use?" when asked to do something is as useful as the proverbial bump on a log. He is mostly in the way of progress and development—a parasite living off the results of others' efforts—a dead load on the enterprising portion of the community.

Punctuality, and being on the job at the appointed hour, is one of the first essentials of business, otherwise you are handicapped in your start of the day's duties, as is the runner who is late getting away from the post.

There may be music which makes the flesh creep, but it certainly is not the music of the pipes, for they stimulate most people so that they involuntarily want to march with the pipers or dance or keep their feet tapping in time with the rhythm. Next time you are around where the pipers are playing, take notice of how few feet remain still. The pipers of the Lethbridge Caledonian Society certainly know their pipes, and are very generous in enlivening us each year.

Isaac Dickson and Ray Dunlop left on Monday for Drumheller, where they expect to obtain work.

Personal and Local

Mrs Olson went to Lethbridge on Tuesday on business.

W. Fairweather arrived on Tuesday from Lancashire to live here.

Many are anxiously awaiting the results of the school examinations.

Jack Thompson was down from Corbin for the week-end.

J. C. Lang has returned to duty at the depot after two weeks vacation.

Mrs. W. E. Gate left on Tuesday for Saunders Creek to visit friends there.

46 hours by fastest train from Vancouver to Winnipeg—11 hours by airplane. That's speed!

Mr. and Mrs. A. F. Short returned on Monday from a month's trip to the Pacific coast and Alaska.

Arthur E. Graham, McGillivray mine surveyor, left on Monday for Mercoal mine for a few days.

There are some reminders of dead men on Main street buildings. Take a look around and see if you can find them.

Catherine Kilgannon, of the Bank of Commerce staff at Lomond, returned on Tuesday after spending two weeks holiday here.

Dr. and Mrs. McCallum of New Dayton and daughter, spent Tuesday with Mrs. Lindoe, going on to Waterton Lakes.

Miss Margaret Halliwell, nurse-in-training at Medicine Hat general hospital, spent two days with her parents here.

Imagination is one of the greatest aids towards developing business. It is a vital force which successful men know from experience has enabled them to accomplish great things. Look beyond the limits of your own business to get a view of greater things. Those who never climb a mountain never obtain a beautiful view of the valley.

Each day devise or plan on creating some additional business. It will prove beneficial in many ways. Remember that business does not come to he who waits.

A pelican has been seen around Joe Michalek's ranch east of town during the past week, creating keen interest among the younger people.

Marks obtained by John Pietroski in primary school violin examinations by Toronto Conservatory of Music were 82, passing with first-class honors.

Mr. and Mrs. F. Graham, jr. left this morning for an auto trip via the Banff-Windermere route to Edmonton, and were accompanied by Mrs. Graham's father and brother, who came down from Edmonton.

Red Trail maps issued by the Boards of Trade from Lethbridge to Fernie, including Coleman, have been widely distributed throughout the States and western provinces, and will prove a valuable form of publicity.

The Red Tub tea room and ice cream parlor at Lundbreck is always a popular spot to visit when out for an afternoon or evening drive. It makes a pleasant break in the journey, where in this neat parlor you may obtain the finest refreshments which the drive through the hills increases the appetite for. You can't mistake the place, for the Red Tub on the doorstep gives you a friendly welcome. Make it a point to call when out for a drive through the Pass.

Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many

times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you—Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

The Right Community Spirit

Every once in a while in the strenuous, and more or less selfish days of this modern, highly organized period of the world's history, some little incident of downright unselfishness, of the practical application of the Golden Rule, comes to light which does all good who hear of it, and revives our belief in the innate goodness of the majority of our fellow men, a belief which is frequently in danger of being wholly destroyed when we read of so much deceit, dishonesty, cruelty and crime.

Such an incident, causing a warm glow in our hearts, occurred in the Carleton Place, of Saskatchewan, a few weeks ago. When Stanley Dugan and his eldest son, Garfield, died within three months of each other, leaving Mrs. Dugan and eight small children, the neighbors decided to help put in the crop. Therefore, on a given day, eighteen tractors gathered at the Dugan farm and plowed 160 acres in seven hours. The following day other neighbors harrowed and seeded the field. Neighbor women provided the "tea" for the "bees." While the "bees" were organized and managed by the Carleton Place L.O.O.F. No. 26, it was carried out by a community spirit and is typical of the community spirit which prevails in the Carleton Place district.

It was this same spirit that animated the early pioneers in Eastern Canada who joined forces in conquering the virgin forests, built roads, schools, churches, grist mills, and in one "bee" after another assisted each in turn to build houses and barns. And when this "last great west" was opened to settlement, the same spirit prevailed, neighbors assisting neighbor through their difficulties, and in times of sickness and disaster. Only so was the settlement of Canada made possible, and the foundations laid for the successes of today.

It was the cultivation and practice of this neighborly community spirit of self-sacrifice and co-operation which established for the West its reputation of open-handed friendliness and generosity. But as population increases, cities and towns grow up, modern means of communication expand, the vacant spaces fill up, and a more highly organized and mechanical development takes place, there is danger of this fine old feeling of neighborliness disappearing. It would be a pity if this should happen, and it is vastly encouraging to learn of such a happening as that at Carleton Place.

And if we are losing something in actual practice of the community spirit in our larger centres of population, it is gratifying to know that it still prevails in the hearts of Western men and women. It is as strong as ever in the more remote and pioneer districts of the West, finding expression in the building of small community hospitals and Red Cross Outposts, in community clubs and halls, homemakers' clubs, and numerous co-operative efforts for the welfare of all, regardless of race, language, creed, or worldly possessions.

Helpful as the neighborly assistance extended by the people of Carleton Place undoubtedly was to the bereaved Widow Dugan and her children, alleviating her sorrow and removing worry from her mind, we venture to say that those who participated in extending that assistance found a glow of satisfaction, a joy, in rendering this service far greater than any realized by them from any successful venture undertaken in their own behalf.

Furthermore, the neighborly spirit and co-operation thus displayed, and the untiring of forces in the performance of a splendidly unselfish effort, cannot fail to leave its impress upon the whole community. It must inevitably make easier the settlement of those little disagreements and differences of opinion which arise in all communities regarding school, church, municipal, and other local affairs. It means that not Widow Dugan alone, but the whole community has benefited, because the right kind of a community spirit burns more brightly than before.

Find Canadian Wood Useful

London Firms Using Mill Waste For Making Linoleum

That shavings and other planing mill waste are being used experimentally in the manufacture of linoleum, in place of "wood flour," which is at present imported from the continent, was revealed in the annual report of the Department of Scientific Industrial Research, issued at London, England. The report dealt in particular with the development of the empire's timber resources. One London firm sought a suitable wood to make boot lasts. The department experimented and finally recommended that Canadian or home-grown birch would serve the purpose.

Nothing Else To Do

The judge was examining a witness to an automobile accident, as he remarked:

"You say you overheard the argument between the traffic officer and this defendant?"

"Yes, sir, I did."

"Then tell the court what the defendant was doing."

"He was listening."

A Golf Triumph

First Amateur To Make Par On Famous Jasper Golf Course

For the first time in its history, an amateur has played the famous Jasper Park Lodge Golf Course in Par. The triumph belongs to E. B. Tait, of Pasadena, California, scion of one of the most noted golf families of Scotland. Par for the Jasper Golf Course, where the Canadian Amateur Championships will be played in August, is 70.

Mrs. Tait's first visit to Jasper was a quarter of a century ago, when, as a survivor he went through that country in advance of the railway.

Miller's Worm Powders are a pleasant medicine for worm-infested children, and they will take it without objection. When directions are followed it will not injure the most delicate child, as there is nothing of an injurious nature in its composition. They will speedily rid a child of worms and restore the health of the little sufferers whose vitality has become impaired by the attacks of these internal pests.

Agricultural School For Lethbridge

Development of the plan to establish an agricultural school in Lethbridge with the Federal Experiment Farm at Lethbridge, Alberta, as the basis for the practical demonstrations, is being proceeded with, according to Hon. George Howley, Minister of Agriculture.

Oil-Electric Car Service

Application is being made to the Canadian National Railways by the Drumheller Board of Trade for an oil-electric service to run daily from Drumheller to East Coulee colliery over the joint C.P.R. and C.N.R. line.

Women Control Wealth

About 41 Per Cent. Of Individual Wealth Of U.S. Held By Fair Sex

Approximately 41 per cent. of the individual wealth of the United States is controlled by women, so a recent bank survey shows. Should this proportion increase at the present rate, financial matriarchy would be established by the year 2025. Women are receiving 70 per cent. of the estates left by men and 64 per cent. of the estates left by women. In addition they are the beneficiaries of 80 per cent. of the \$95,000,000,000 worth of life insurance policies in force in this country. According to income tax reports the majority of incomes of over \$100,000 are in feminine hands, while over 41 per cent. of the entire income tax is paid by women. As a result of their financial ascendancy women comprise an actual majority of stockholders in the largest corporations in America, and constitute from 35 to 40 per cent. of investment house customers.

A TIRED OUT FEELING

Is a Sure Sign That the Blood Is Thin and Watery

"I am glad to have an opportunity of testifying to the benefits I derived from the use of Dr. Williams' Pink Pills," writes Mrs. Lawrence Kennedy, St. Joseph, N.B. She further says:—"Some years ago I was working as a stenographer, and became badly run-down. I always had a tired-out feeling, had no appetite and suffered terribly from backache. Almost every month I had to remain from the office for a day or two. I was advised to try Dr. Williams' Pink Pills, and I have reason to be glad that I followed this advice. Before I had been taking the pills very long I began to feel better. Continuing their use my strength came back, I regained my appetite and the terrible backache from which I had suffered disappeared. I have been married some years now and have two fine healthy children, a girl and a boy, and am in the best of health. All this I owe to Dr. Williams' famous Pink Pills, and I feel that these few lines may help some other weak, run-down person." All work, run-down people who feel this high-spirited, tired-out feeling, find through its use new health and strength. You can get the pills from any dealer in medicine, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Recipes For This Week

(By Betty Barclay)

FRENCH CARAMEL CUSTARD

Four eggs, six tablespoons sugar, one cup milk and a little water, make this cold, tasteful summer dessert. Separate the egg-whites and yolks, and beat the whites until they are firm. Add four tablespoons of sugar to the yolks. Combine the whites and yolks, and add the milk, stirring the mixture slowly. Make a caramel, using two tablespoons sugar and one-half cup water. Pour this into a tin mold and then add the custard. Place the mold in a pan of water and bake in a slow oven for twenty-five minutes, or until a knife blade will come out clean. When the custard is cold, turn it out on a platter and serve it with or without a sauce.

SPONGE CAKE

3 egg yolks.
1/2 cup sugar.
1/2 tablespoon lemon juice.
1/2 teaspoon grated lemon rind.
3 egg whites.
1/2 cup flour.
1/2 teaspoon salt.
Beat egg yolks until thick and lemon colored and add sugar gradually, beating constantly. Add lemon juice, rind and salt. Beat egg whites, folding mixture to keep in air. Cut and fold in flour and salt. Put in small deep cake pan and bake 40 minutes in a moderate oven, 350 degrees Fahrenheit.

Big Game Hunting

During the 1928 big game hunting season in Saskatchewan, 277 hunters took the field as compared with 1,723 in 1927. Of the 1928 total, only six were not residents of the province.

Mothers Value This Oil.—Mothers who know how suddenly croup may seize their children and how necessary prompt action is in applying relief, always keep at hand a supply of Dr. Thomas' Electric Oil, because experience has taught them that this is an excellent preparation for the treatment of this ailment. And they are wise, for its various uses render it a valuable medicine.

Sugar Beet Crop

Sugar beets in Southern Alberta, are making good progress. Indications are that there will be about 8,500 acres thinned this year, spring losses being less than last year.

Minard's Liniment for Summer Colds.

Has Escaped Lightly

Germany's Debt To Allies Reduced To Lowest Possible Amount

When Clemenceau, Wilson and Lloyd George met at Versailles in 1919 they decided that Germany must pay the Allies \$125,000,000,000. This was when Lloyd George was shouting "Hang the Kaiser" and "Make Germany pay for the War."

The Kaiser wasn't hanged. Germany didn't begin to pay for the war.

Germany didn't even begin to pay the \$125,000,000,000. What happened was that financiers and technicians and statesmen kept arguing and wrangling, and the more they argued and wrangled the less likelihood was there for Germany to pay.

By 1923, with war memories fading, Germany's bill was cut down to \$38,000,000,000. This was by the Dawes Commission.

Now the bill has been cut again. This time, Germany is given 599 years to pay \$27,000,000,000, or, if she chooses, and can find her way clear, may pay \$800,000,000 at once and call the thing square.

In other words Germany's bill is, at the worst, cut by nearly \$100,000,000,000 from the original levy. It is a tremendous reduction. England is to get just enough to pay her war debts to the United States; France enough to pay the United States and England.

It was nonsense of course to ask Germany to pay \$125,000,000,000, or anything like it. That would simply have broken Germany, impoverished her; nobody would have got anything.

So ends the chapter about making Germany pay. War, certainly is "Great Illusion."—Ottawa Journal.

Mussolini Plans To Close Italian Saloons

Has Closed Twenty-Seven Thousand In Last Five Years

Benito Mussolini, in an interview published in the August issue of the World's Work, is quoted as saying that, principally for economic reasons, he intends to cut down wine consumption by Italians.

"I have closed 27,000 saloons in five years," Mr. Duce is quoted as saying. "Give me time and I will close them all."

Italy, he is quoted as declaring, devotes 8,500,000 acres of land to vineyards, or more than half of the total vineyard acreage of all Europe, consuming the entire production within its borders and importing more, while it is unable to raise enough wheat to meet its own needs.

Complete In Itself, Mother Grace's Worm Exterminator does not require the assistance of other medicines to make it effective. It does not fail to do its work.

A pretty saleswoman is a first-class court attraction.

Gourds have been used as cups and containers since ancient times.

Chief Submarine Disasters

Appalling Loss Of Life In Last Fourteen Years

Submarine disasters have taken a heavy toll of life in the navies of the world. Some of the major accidents to underline that toll follow:

March 24, 1915—United States submarine F-4 sunk in Honolulu Bay, loss of life 21.

1922—British submarine K-5 disappeared off the Scilly Islands while in diving practice, 57 dead.

March 23, 1922—British submarine H-42 sunk by a British destroyer near Gibraltar and 26 men killed.

August 21, 1923—Japanese submarine foundered beside a dock at Kobe, Japan, 85 dead.

January 10, 1924—British submarine L-24 sunk by British battleship, Portland, England. Death list 43.

March 19, 1924—Japanese submarine sunk by Japanese battleship off Saase, Japan, 49 dead.

September 23, 1925—U.S. submarine S-51 sunk off Block Island, R.I., by steamer, "City of Rome," 33 dead.

December 17, 1927—United States submarine S-4 sunk off Provincetown, Mass., by coast-guard cutter Paulding, 40 dead.

August 6, 1928—Italian submarine F-14 sunk in Adriatic Sea in collision with destroyer, 31 dead.

July 9, 1929—British naval submarine H-47 collided with the British submarine L-12, 22 miles off the coast of Pembroke, Wales, in the Irish Sea, 24 lives lost.

The worst post-war British submarine disaster recorded took place in 1925, when the H-1 was sunk off Star Point with the loss of 68 lives.

Many British Premiers Came From Scotland

Ramsay MacDonald Makes Fifth In Last Thirty Years

The Scotch appear to have a strong hold on the British premiership. J. Ramsay MacDonald is the fifth prime minister from Scotland in the last thirty years. The others were Lord Rosebery, Sir Henry Campbell-Bannerman, Earl Balfour, and Bonar Law.

During the same period, the Welsh have had one premier, David Lloyd George, and the English two, Lord Salisbury and Stanley Baldwin.

It Testifies For Itself.—Dr. Thomas' Electric Oil needs no testimonial of its powers other than itself. Who ever tries it for coughs or colds, for cuts or contusions, for sprains or bruises, for pains in the limbs or body, will know that medicine proves itself and needs no guarantees. This shows why this Oil is in general use.

"Dad, what are ancestors?"

"My boy, I'm one of yours and your grandpa is another."

"Well, then, why do people brag about them?"

Keep Minard's Liniment always handy.

An eel has two separate hearts. One beats sixty, the other 100 times a minute.

ATTENTION, WOMEN OF MIDDLE AGE!

Mrs. Goodkey Tells Her Experience with Pinkham's Compound

Byemore, Alberta.—"The Change of Life was the trouble with me and I felt like I was going to die. I was weak and could not sleep, had a poor appetite and could not do much work. I am taking Lydia E. Pinkham's Vegetable Compound now and I feel like a new woman. I saw it advertised in the papers and tried it and Lydia E. Pinkham's Sensitive Wash. I have recommended it to all of my friends." Mrs. Wm. GOODKEY, Byemore, Alberta.

Northern Alberta Railways

Two Transcontinental Railways Take Over Lines In Alberta

On July 2nd last, the four Alberta Government-owned railways—the Edmonton, Dunvegan and British Columbia Railway, the Central Canada Railway, the Alberta Great Waterways Railway and the Pembina Valley Railway—were taken over by the Canadian Pacific and the Canadian National and merged into one concern to be known as the Northern Alberta Railways.

LONG SLEEP MAKES BABY HAPPY AGAIN

"Our baby kept waking up several times a night, until we started giving him a little Castoria after his last nursing," says an Iowa mother. "He slept soundly from the first night and it made him look and feel worlds better." Baby specialists endorse Fletcher's Castoria, and millions of mothers know how this purely-vegetable, harmless preparation helps babies and children, with colic, constipation, colds, diarrhea, etc. The Fletcher signature is always on the wrapper of genuine Castoria. Avoid imitations.

"Von" Is Not Title
Prohibition of the use of titles in the post-war republic of Czechoslovakia does not apply to the word "Von," an approximate social equivalent to the English "Sir." The constitutional supreme court ruled in the case of Ferdinand Eusebius von Lobkowitz, the Czechoslovak minister of interior, that the "Von" was part of a name and not a title.

Minard's Liniment for Neuralgia.

Spruce Best For Rayon

The spruce of Northern Canada is considered the most suitable raw material for the manufacture of rayon by the viscose process. Cellulose, in the form of sulphite pulp, derived from this wood, is now being shipped from Canada to all parts of the world for the manufacture of artificial silk.

WINDOLITE The Improved Glass Substitute

MADE IN ENGLAND

WINDOLITE stands for 100 per cent. sunlight. It makes light hit strong windows in the most stable, healthy houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanitariums, hotel beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 38 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness weighs about 135 to 150 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

CANADA WOULD HELP U.S. TO STOP RUM RUNNING

Ottawa.—If the United States is prepared to check up on their own boats, Canada will consider any further reasonable measure to halt the liquor traffic across the border. This offer was made by Hon. W. D. Euler, minister of national revenue, in a statement replying to numerous petitions asking the government to refuse clearances to liquor-laden craft.

Canada is willing to keep Canadians out of the liquor export business, he said.

At present the United States has no regulation requiring their vessels to obtain clearances. Accordingly, the authorities there have no means of checking up on the activities of their own people, the statement points out. If the Canadian practice were carried out they would have a means of control which would provide in a large measure the remedy for the conditions for which they complain.

The statement reviews the rum-running situation between the two countries and in a general way replies to the barrage of communications which have been pouring in on the ministers from temperance people in Canada who wished this country to refuse liquor clearances.

The statement sets forth that practically 100 per cent. of the rum runners are American citizens who ply their trade with United States boats, but if Canadian citizens in Canadian boats engage in the traffic the government would be prepared to enact legislation dealing with the matter.

Only from two per cent. to five per cent. of the liquor consumed in the United States comes from Canada, the statement continues. Canada spends a million dollars a year preventing liquor-smuggling from friendly countries which do not prohibit clearances.

Mr. Euler unequivocally denies that the government is favoring the liquor interests as a return for campaign funds. He points to the legal actions against brewers and distillers as proof of this.

Considerable emphasis is laid on the fact that the boats engaged in liquor-running along the Canadian border are required to get clearances by the Canadian government, but not by the government of the U.S. Mr. Euler thinks if the U.S. authorities would require clearances it would largely remedy the situation.

Should the Dominion Parliament enact legislation prohibiting clearances, the effect would probably be to "drive the traffic underground saddle up with heavy expenses and do our neighbors no good."

Hoyt Returns To New York

Plane Only Slightly Damaged In Making Forced Landing

Winnipeg.—After successfully breaking the record flying time from New York to Nome, Alaska, Captain Ross G. Hoyt, of the United States army, who was forced down by fuel trouble recently, on his return journey, at Valemont, British Columbia, about 40 miles from Jasper National Park, passed through Winnipeg over Canadian National Railways, on his way to New York.

Flying by way of Minneapolis, Edmonton, White Horse, Yukon, Fairbanks, Alaska, and thence on to Nome, Hoyt made the flight, a distance of 4,300 miles, in 32 hours' actual flying time. It was on the return journey, near Valemont, when he first noticed the trouble, and not having sufficient altitude to make the closest landing ground at Henry House flats, near Jasper, he was forced to land in a little valley, which damaged his plane. The plane, although only slightly damaged, was beyond Valemont's facilities for repairs, and the plane was loaded on a freight car for shipment to New York.

"My disappointment in not being able to fly home," said Capt. Hoyt, "was offset by the wonderful kindness and the many courtesies which the Canadian National Railways extended to me."

New Flying Instructor

Ottawa.—A. H. Wilson was approved by the civil aviation branch as instructor of the Vancouver Flying Club. He replaces Percy Hainsworth, who was killed in the crash of the club's plane two days ago. Wilson formerly conducted a flying school for the British Columbia Airways at Victoria, B.C.

British Naval Reduction Steamers En Route To Hudson's Bay

Will Suspend Work On Cruiser and Submarine Construction

London, England.—In an intensely dramatic atmosphere, Rt. Hon. Ramsay MacDonald revealed to the House of Commons the policy of the Labor Government in the matter of naval reduction. He declared that his ministry was prepared to walk hand in hand with the government of the United States to avoid competitive armament and finally, after a final agreement had been reached, it was planned to summon the nations of the world into conference on the subject of general paring down of armed forces and materials by land and sea.

Premier MacDonald first told of his conversations with the United States ambassador, General Charles G. Dawes, who was himself seated in the distinguished strangers' gallery along with other diplomats.

The government's policy, he said, was to make the Kellogg anti-war pact an effective influence in international relations.

For the present the government proposed:

- 1.—to suspend all work on the cruisers Surrey and Northumberland, now under construction.
- 2.—To cancel the building of the submarine depot ship, Madstone.
- 3.—To cancel the building of two submarines already contracted for.
- 4.—To slow down dockyard work at other naval stations.

With regard to the 1929-1930 building program, the premier said in any case no further commitments would have been entered into before the autumn, but that no steps at all would be taken to proceed with it until the whole matter had received further consideration.

Premier MacDonald intimated October looked a likely month for his proposed visit to Washington for a conference with President Hoover for the purpose of advancing the objects of disarmament and world peace.

Rust Resisting Wheat

Results From Experiments Are Being Confidently Expected

Ottawa.—The experiments looking towards a variety of wheat which will be "real wheat" and at the same time have complete rust-resisting qualities are being continued, said Dr. J. H. Orville, deputy minister of agriculture, here recently, and results are being confidently hoped for.

While there are a number of rust-resisting varieties, certain difficulties have stood in the way of their development generally. At present those varieties are being experimented with in conjunction with the higher grades so that the results might produce a top grade of Canadian wheat to which the rust-resisting properties may adhere.

Canada's Population

Total Population Placed At 9,796,000 As At June 1st, 1929

Ottawa.—Canada's total population stood at 9,796,000 as of June 1, 1929, according to the census taken by the Dominion Bureau of Statistics. This is an increase of approximately 38,000 persons over the same date last year, when the estimated population was 9,658,000.

The report, covering the years 1921-29 inclusive, further showed that the Dominion's population had increased by more than 1,000,000 persons during that period. In 1921, the census recorded 8,785,483 persons.

Save for Prince Edward Island and the Yukon, all provinces enjoyed population increases during the last year.

Carried Patriotism Too Far

Winnipeg.—A. Kristjansson, a visitor from the United States, was fined \$25 and costs in police court on a charge of being disorderly in a public place. He complained noisily in a local theatre when the audience failed to applaud the American flag when a news reel parade picture was flashed on the screen.

Grain Standards Board

Winnipeg.—The newly appointed Grain Standards Board, which will designate the new 75-25 out-turn standard for grain shippers, met here and approved, with one exception, standards for all grades from number one northern to number six wheat.

Appointed Acting Judge

Ottawa.—Charles Morse, K.C., registrar of the exchequer court of Canada, has been appointed an acting judge of that court for the purpose of dealing with appeals arising out of the revaluation of soldiers' land.

QUEBEC CONSERVATIVE LEADER

Mayor Camille Houde, of Montreal, on July 10, was unanimously elected leader of the Conservative party of Quebec, by the 1,000 delegates gathered in convention. Mr. Houde, 1916, was nominated by Laurent Barre, of Rouville, and seconded by Winfred Hackett, of Stanstead County.

No Extra Harvesters Needed For West

Sufficient Help In Canada Says Minister Of Immigration

Winnipeg.—With a light grain crop in Western Canada this year, the Canadian Government has decided to extend no call to Great Britain for the unemployed there to come to the Dominion and help in the harvesting. Hon. Robert Forke, Canadian minister of immigration, who was in Winnipeg recently, he stressed the fact that there is sufficient help in Canada to successfully harvest this year's crop.

"I have been through the west," he declared, "and I found crops lighter, but I think that we will not need as many harvesters this year as last. There are sufficient men in Canada to harvest this year's crop."

Need Great Empire Policy

Otherwise Great Britain Will Sink To A Second Class Power, Says Conservative Candidate

London, England.—Unless a great Empire policy is adopted, Great Britain will sink to the position of a second class power, said Sir John Ferguson, Conservative candidate in the by-election in Twickenham, in a statement to his supporters at Hounslow explaining his Empire free trade policy.

Conservative headquarters declined to support Sir John because his Empire free trade policy is inconsistent with the general party program and their action has given rise to a lively debate within the Conservative party.

Grants Permission For Flight

Tokio.—Official permission has been granted by the Japanese Government to Lt. Harold Bromley, a native of Victoria, B.C., who plans a Tacoma-to-Tokio flight to fly over Japan and land at Tachikawa air field, 25 miles west of Tokyo.

Centenarian Dies

London, England.—At the age of 102, Lady Noble, widow of Sir Andrew Noble, famous armaments manufacturer, died, July 23, at Bath. Lady Noble was born in Quebec, the daughter of Alexander Campbell, a notary of Lower Canada.

Killed By Bandits

Buffalo, N.Y.—A cablegram from Han Yano, China, reports the killing by bandits of Rev. Timothy Leonard, missionary with the Chinese Missionary Society, and his Chinese assistant, Father Leonard was from County Limerick, Ireland.

Severe Earthquake In Iceland

Was Worst Shock Country Has Experienced In Years

London, England.—Reykjavik despatches to the London Daily Mail said the southwest coast of Iceland had experienced its most severe earth shock in years. Big concrete buildings in the capital swayed and terror-stricken inhabitants abandoned all houses in a few seconds. The shock was most severe near Mount Hekla. No casualties have been reported. Many of the island's residents spent the night under the open sky.

New President Elected

Native Of Winnipeg Honored By British Medical Association

Manchester, Eng.—Dr. Harvey Smith, a native of Winnipeg, was formally elected president of the British Medical Association. The association will meet in Winnipeg next year, and Dr. Smith remarked the invitation to visit Winnipeg had first been extended when the association met in Montreal 33 years ago.

"It seems a long time to wait, but ultimately the great reward comes to us," he said.

CHINESE ANXIOUS TO AVERT WAR WITH RUSSIA

London, Eng.—Rt. Hon. Arthur Henderson, foreign secretary, told the House of Commons that he had reason to hope that the danger of war being averted in the Russo-Chinese situation.

He said he had received from the Chinese charge d'affaires assurance from the Chinese Government that it was anxious for a pacific solution, that it would take no aggressive action and that it was ready for a round table conference with Soviet representatives.

The assurance added, said Mr. Henderson, that if Soviet Russia should resort to forcible measures the Chinese government would appeal to the League of Nations under articles of the Covenant.

Suggestions were made in London that the Chinese nationalists government has asked the Japanese government to intervene in its controversy with Soviet Russia to avert actual hostilities between them.

The visit of the Chinese minister, Mr. Wangfu upon Baron Shidehara, Japanese foreign minister at Tokyo, was believed to have offered the opportunity for such a request. There was some speculation as to whether the Chinese authorities in the reported arrest of 300 other Russian employees of the Chinese Eastern had not further complicated the situation which had begun to appear much less tense than formerly.

It was believed in any event that the Japanese action, which Reuters said it had learned authoritatively had been taken, in closing the Manchurian southern railroad to troop movements, would deter militants among the Chinese who would thus find their way into northern Manchuria greatly hampered.

Attention still was centred here upon attempts of the United States to intervene. General belief was that the invoking of the Kellogg anti-war pact would be successful in averting hostilities.

London, England.—The British Government has no intention of increasing the number of British battalions in China in the near future.

Answering questions in the House of Commons, Right Hon. Thomas Shaw, secretary for war, gave this assurance. The minister declined to say whether he considered the present British forces in China adequate or too large.

At present there are six British battalions, and one battalion of Indian troops stationed in China, the minister said.

PONTIFF EMERGES FROM VATICAN AFTER LONG WAIT

Vatican City.—The 56-year existence of "the prisoner of the Vatican" was ended as Pope Pius XI, emerged from the Vatican palaces, in a procession such as the Eternal City has not witnessed since the days of lavish medieval religious pageantry.

Following a long procession which was more brilliant and colorful than even the most enthusiastic had predicted, the head of the Roman Catholic Church was borne from the wide entrance of St. Peter's Cathedral in the last hours of daylight. Before a crowd of hundreds of thousands, the Pope was carried on a dais around the Colonnades of St. Peter's Square and returned again to the altar beneath the massive dome of the cathedral.

He held between his hands the golden monstrance of the Sacred Host and there spread out around him the elaborately costumed officials and functionaries of the state, Vatican City, flanked by the black mass of a vast crowd of spectators.

For a moment at the climax of the ceremony, the figure of the Pope was a mass of white and gold which appeared to be a scintillating statue as it rested motionless in the deep twilight and amid the countless candle flames in the hands of those around the altar.

The swelling chant of the chorists was stilled and the Pope blessed the crowd.

Pope Pius left the entrance of St. Peter's Cathedral at 7.35 p.m. at the end of a long procession which had passed around the square. He was returned to the altar at 8.25 p.m.

The procession formally marked the emergence of the Pope under the recently signed Lateran Treaties, as sovereign of the state of Vatican City.

Although he did not leave Vatican City territory, it was the first time since the fall of the church's temporal power in 1870, that a Pope had left the Vatican palace grounds. The crowd was so great that officials found it difficult to estimate but far more than 200,000 persons packed the great square and all available surrounding points.

The long procession, its choir chanting brightly, moved with great solemnity from the wide doors of the cathedral, proceeding around the colonnades and returning to the cathedral where the Pope, surrounded by the brilliantly costumed company, raised high the glittering monstrance, and blessed the crowd. A splendid climax to the ceremony of the release of the prisoner of the Vatican.

Aid For Wainwright

Supplies Sent To Stricken Town By Alberta Government

Edmonton.—A carload of emergency supplies, consisting of groceries, clothing and furniture, was sent to Wainwright by the provincial government for the relief of a group of families left in difficult circumstances by the big fire. This action was taken on the basis of a report submitted by G. B. Henwood, deputy attorney-general, and H. A. Craig, deputy minister of agriculture, who visited the stricken place and conferred with a committee of the town council as to necessary relief measures.

To Fulfill Speaking Tour

Winnipeg.—The speaking program of Hon. Herbert M. Marler, Canadian first minister to Japan, who was called to Montreal owing to the death of his father, has not been cancelled, it was stated by his secretary, A. L. Hall. Addresses which Mr. Marler is scheduled to give at Regina, Edmonton, and Calgary, will necessarily be delayed a week, but he expects to be present at functions in all three cities and arrive at Vancouver on August 5, for his trans-Pacific connection.

No Reception For Riflemen

Ottawa.—No formal reception will be given the Canadian Bisley winners by the Dominion of Canada Rifle Association. It was announced by Col. R. J. Birdwhistell, secretary of the association. Any reception which Lieut.-Col. R. M. Blair, or Lieut. Desmond Burke may receive will depend on their own municipalities or military units.

Churchill Mail Service

Churchill.—Mail service from Churchill was opened on Friday, July 19, the postal packets being carried through from Mile 445 by train.

Canadian Pacific Directors Inspect New Duchess

Following the annual meeting of the Company, the president and directors of the Canadian Pacific paid their first official visit to the "Duchess of York," latest of the 40,000 ton liners built for the St. Lawrence route to fly the red and white chequer flag.

Left to right: Col. Henry Cockshutt, Sir Charles Gordon, James A. Richardson, Senator F. L. Belgrave, Rom H. McMaster, Captain R. N. Stuart, V.C. D.S.O., and her U.S.N.C. R.N.R., commander of the vessel, W. N. Tilley, K.C., E. W. Beatty, K.C., chairman and president, W. A. Black, Sir Herbert S. Holt, and Grant Hall, senior vice-president.
